SUMMARY

Final-year Computer Science student at UKSW (GPA 4.28/5) combining a technical background with 8 years of art school and UI/UX training. Experienced in explaining technical details in plain language through clear documentation, bilingual (English/Polish) content and product releases. Hands-on visual content creator: video editing, hand-made 2D and 3D graphics, UI design, everyday Canva and Microsoft 365 user. Team lead on a current student project. Analytical, proactive, organized and attentive to detail, eager to grow soft and consulting skills in an international, collaborative team.

SKILLS

- **Communication & content:** technical writing, explaining technical topics in plain language, English copywriting and editing, bilingual content (English/Polish), storytelling, user-facing documentation
- **Visual & digital content:** video recording and editing, graphic design in Canva (regular use), PowerPoint presentations, hand-made 2D illustration and 3D modeling, pixel art, UI/UX design
- **Change management & adoption:** release planning, user testing and feedback, onboarding new users, comparing and selecting technology solutions, stakeholder collaboration
- **Digital workplace tools:** Microsoft 365 (PowerPoint, Word, Excel, Outlook, Teams, SharePoint, OneDrive), Canva, Jira, Trello, Git/GitHub
- **Technology:** HTML, CSS, JavaScript, C/C++, C#, Python, SQL, Docker, Linux, Firebase, Godot, Unreal Engine, Three.js
- **Soft skills:** analytical thinking, self-driven, proactive, organized, attention to detail, collaborative team player, quick learner

EXPERIENCE

Student Intern, Information Systems Center, UKSW | Warsaw | Mar 2026 – Apr 2026

- Built front-end features in HTML, CSS and JavaScript under a mentor's guidance, delivering tasks in phases with regular progress reviews.
- Created a 2D browser detective game with my own hand-written CSS stylesheet and UI: interrogations, evidence notebook, random story variants and multiple endings (live demo).
- Collaborated through a professional Git/GitHub workflow: commits, code review and revisions based on feedback.

PROJECTS

Cog Chain, 3D puzzle game released on Windows and Android | Mar 2026 – Jun 2026

- Took the product from idea to public release on my own: concept, all 2D and 3D graphics created by hand, video editing, testing and publication.
- Created bilingual content (English and Polish) for 18 levels, user accounts, cloud saves, a global leaderboard and 9 achievements; wrote a player guide and UML/Doxygen documentation.

Team Lead, Planetarium 3D (interactive sky simulator) | Oct 2026 – Present

- Lead a student team: defined project scope, compared technology options, presented the recommended solution and coordinate tasks through Git/GitHub.

3D Model Gallery, containerized web application | Oct 2025 – Jan 2026

- Built a browser gallery for viewing 3D models (Three.js) that starts with one command on any computer, with no manual setup.
